1.Introduction

1.1 Welcome to UniTrade

UniTrade is a peer-to-peer marketplace platform built for South African university students to buy and sell items such as textbooks, study materials and other students essentials. The platform verifies student identity before granting full access, uses AI-assisted risk scoring to screen listings before they go live and manages the entire transaction lifecycle, from browsing and reservation, through in-person meetups, to secure payment and handover confirmation. Payments are processed via Payfast and PIN-based system confirms that a handover has taken place. A reputation and dispute-handling system supports trust between users.

1.2 Document Purpose

This user manual explains how to effectively use UniTrade, from creating and verifying an account, through listing, browsing, reserving and buying items, to completing a meetup and resolving disputes if something goes wrong. It is intended to help users understand each step of the process, what to expect at each stage, and what actions are available to them, so they can use the platform confidently and safely.

1.3 Who can Use UniTrade

- Registered students at South African universities with a valid university email domain.
- Both buyers and sellers, every user can act in either role
- Students at any stage of the verification process, with access levels that differ depending on verification status:
 - Unverified/pending users: buyers can browse listings only (no chat or purchase), sellers can create listings, but they're saved as drafts and stay invisible to others.
 - Verified users: full access to browsing, chatting, reserving, listing and buying.
- Admin staff, who are internal reviewers assigned per university, responsible for handling flagged verifications, listings, and disputes.

Key Features

- **Student verification** – Sign-up with university email domain checking, OTP verification, and proof-of-registration upload, backed by an AI scanning layer with admin fallback for uncertain cases.
- **AI-assisted listing moderation** – Listings are automatically risk-scored (reserve-image checks, content classification) and routed to go live or held for admin review.
- **Marketplace browse** – View listings with title, price, condition, category and photos, reserve and add to your wishlist directly from the product card.
- **Reservations** – Express interest in an item to trigger an automated message and a time-boxed reservation, with clear acknowledgement and response windows.
- **In-app chat** – Coordinate directly with the other party to arrange meetup time and location through a meetup scheduler.
- **Secure payment** – Pay instantly via Payfast after inspecting the item in person.
- **PIN-based handover confirmation** – A PIN generated after payment confirms the item changed hands.
- **Ratings and reputation** – Rate the other party after a transaction, reputation scores factor into trust and abuse detection.
- **Dispute reporting** – flag listing-quality issues, no-shows, or false listing claims for admin review.
- **Recommendations** – Behaviour-driven suggestions like “Popular for course code” or “Frequently bought together”, based on real student activity rather than a fixed material list.

2. User Roles and Responsibilities

UniTrade has three primary roles. Most students will act as both a buyer and a seller depending on the transaction, while admins are internal staff supporting the platform.

2.1 Buyer

Responsibilities:

- Complete registration and identity verification before gaining full buying access.
- Browse listings and use “Reserve” to initiate a reservation.
- Respond and schedule a meeting within the 24-hour window, to keep the reservation active.
- Communicate with the seller in-app chat to arrange a meetup time and location.
- Physically inspect item at the meetup **before** paying.
- Pay via Payfast only once satisfied with the item.
- Enter the PIN exchange process by receiving the PIN after payment and showing it to the seller to confirm handover.
- Take photos at the meetup if a listing does not match its description, to support any quality complaint.
- Rate the seller and item after transaction.
- Report listings that appear false, misleading or incorrect.

Access limits while unverified: Can view listings only, cannot chat, reserve or purchase.

2.2 Seller

Responsibilities:

- Complete registration and identity verification before listings can go live.
- Create accurate listings, including title, description, price, condition, and course/module tags and upload clear, honest photos.
- Acknowledge a buyer’s reservation.
- Coordinate meetup time and location with the buyer.
- Bring the correct item, matching the listing, to the meetup.
- Allow the buyer to photograph the item at the meetup if requested.
- Enter the buyer’s PIN after payment to confirm and close the handover.
- Respond to admin for changes if a listing is flagged (e.g. reupload clearer photos or a correct description)

Access limits while unverified: Can create listings, but they remain in draft status and are invisible to buyers until the seller is verified.

3.3 Admin

Responsibilities:

- Review flagged student verifications and approve or reject access within the ~2-3 days SLA.
- Review listings flagged as medium-for-review or high risk by the AI scoring system and approve, reject or request changes.
- Investigate reported listings for false or misleading claims.
- Review listing-quality complaints after a failed meetup and apply strikes where appropriate.
- Monitor patterns of repeated no-shows and apply reputation consequences once the threshold is crossed.
- Oversee flagged listing images surfaced through the moderation queue.
- Notify users of decisions via in-app and email notifications.

3. System Requirements

Requirements

- **Device:** Any smartphone, tablet or a computer capable of running a modern web browser and connecting to the internet.
- **Operating system:** No specific OS required, UniTrade runs in the browser and works across Windows, macOS, Linux, Android and iOS
- **Browser:** A modern, up-to-date browser with PWA support is recommended for the best experience, such as:
 - Google Chrome (recommended for full PWA support on Android/desktop)
 - Safari (for iOS/macOS – required for “Add to Home Screen” on iPhone/iPad)
 - Microsoft Edge
 - Firefox
- **Account requirements:** A valid student email address at a supported South African university, used during registration and OTP verification.
- **Permissions needed:**
 - Camera or file access, to upload proof of registration and listing photos.
 - Notifications access, for meetup reminders, chat messages, and status updates.
- **Connectivity:** A stable internet is required throughout – for verification, AI listing checks, real-time chat, and payment processing. UniTrade is not designed as an offline-first app, so most features need an active connection.
- **Payment:** A Payfast supported payment method to complete purchases at the meetup.

4.Troubleshooting

4.1 Account and login

Problem	Likely cause	Fix
Invalid email or password	Typo, caps lock, or the account was never verified	Re-enter your details carefully. If you never finished verification, sign up again or request a new OTP.
OTP code not received	Wrong email address, spam folder, or a delay in delivery	Check spam/junk, confirm the email you entered, wait 1 to 2 minutes, then choose Resend code .
Invalid or expired code	The code was mistyped, or it passed its validity window	Request a new code and enter it promptly. Only the latest code works. So, after requesting a new code, never use an old code.
Email already registered	An account already exists for that email.	Use Log in or Forgot password instead of signing up again.
Signup fails with “Something went wrong”	Temporary sever problem.	Wait a moment and try again. If it persists, contact support with your email address and the time of the error.
Logged out unexpectedly	Your session expired	Log in again. You won’t lose listings or reservations.

4.2 Listings

Problem	Likely cause	Fix
Can't submit listing	Required fields are missing or invalid (title, price, condition, category)	Fill in all the required details and try submitting again.
Image upload fails	Unsupported format or file is too large.	Use JPG or PNG and reduce the file size. Try fewer photos at a time.
Listing is live but low visibility, or is "under review"	Automated risk checks flagged something, such as a price far from comparable listings, photos that don't match the category, or images resembling another seller's listing.	Check that your price is realistic, use your own clear photos, and pick the correct category. An admin reviews flagged listings, so no action is needed beyond waiting.
Listing removed after review	It broke the marketplace rules, for example a duplicate or fraudulent listing.	Edit the listing to fix what was flagged and resubmit, if done honestly the listing should immediately go live immediately.
Item shows "Reserved" or "Unavailable"	Another buyer reserved it first.	Browse similar listings or save it to your Wishlist and check back. Reservations that expire release the item again.

4.3 Reservations and PINs

Problem	Likely cause	Fix
"This listing is no longer available" when reserving	Someone else reserved it at almost the same moment	Choose another listing. Only one buyer can hold an item at a time.
Didn't receive the PIN	Payment hasn't completed, or the screen hasn't refreshed	Open the reservation's detail page and check for a pending PIN. Refresh the page if it is not showing.
"Incorrect PIN" at meetup	The PIN was mistyped, or it belongs to a different reservation	Re-enter the PIN exactly as shown in the buyer's reservation. Check that you are on the right reservation.
Status not updating live	The real-time connection dropped (weak network or a sleeping device)	Refresh the page. The latest status loads on refresh.

4.4 General Fixes to try first:

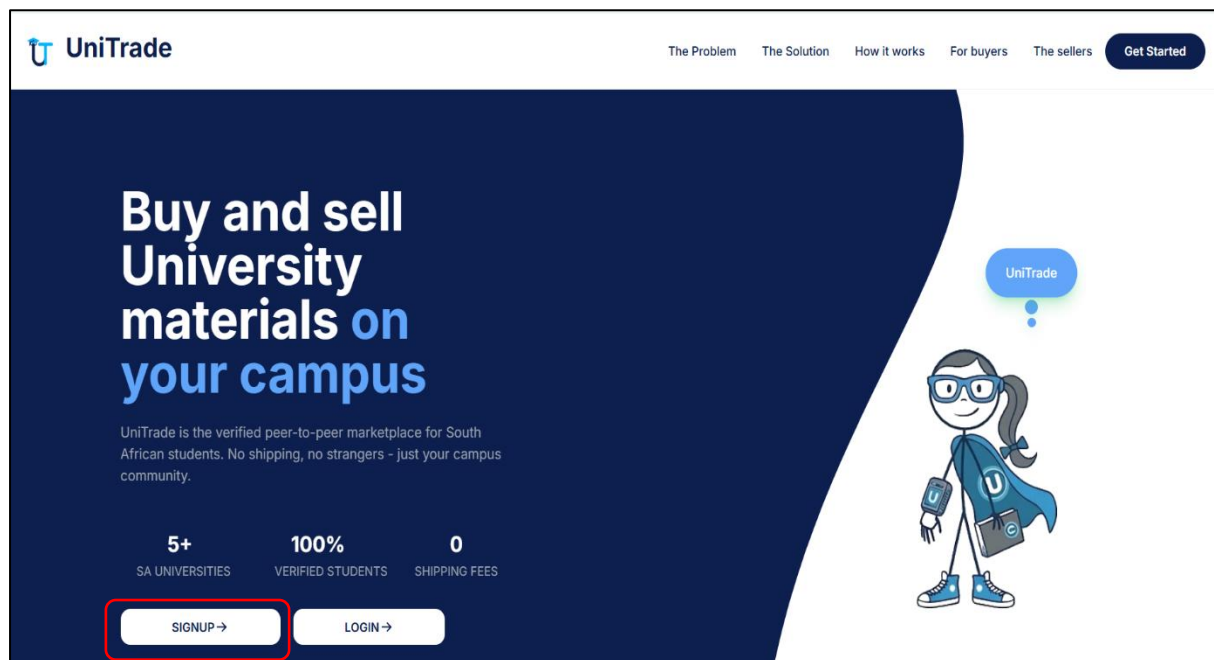

- Refresh the page.
- Check your internet connection.
- Log out and back in.
- Clear the browse cache or try another browser.
- If it still fails, contact support with a screenshot, what you were doing, and the time it happened.
- **Support:** devnexus28@gmail.com

5. Account Management

5.1 Creating an Account

If you are a new user:

1. Navigate to Registration
 - Open your preferred web browser.
 - Go to the UniTrade website.
 - Click “Sign Up” on the home page.

2. Complete the Registration form: Fill in all the required information truthfully:

- First Name
 - Enter your legal first name as it appears on your university records.
 - This will be used to identify you correctly during transactions.
- Last Name
 - Enter your legal surname as it appears on your university records.
 - This will be used for the same verification and identification purposes.
- Email
 - Enter your official student email address (e.g. ending in your university's domain, such as @tuks.co.za).
 - This must be a valid, currently active South African university email.
 - This address is where you will receive your OTP verification code and important account updates, so make sure you have access to it always.
- University
 - Select your university from the provided list.
 - This will be used to match you with the correct student community; ensure listings and recommendations are relevant to your campus.
- Degree Program
 - Enter the degree you are currently enrolled in (e.g. BSc Computer Science).
 - This helps us tailor course-related listing recommendations to your field of study;
- Year of Study
 - Select your current year of study.
 - Like your degree program, this helps the system surface more relevant listings and recommendations.
- Password
 - Create a secure password to protect your account.
 - Minimum length – 8 characters
 - A mix of uppercase, lowercase, numbers and symbols
 - Avoid reusing passwords from other sites
 - Your password is never visible to admins or other users.
 - Use the eye icon to make sure you created the correct password.

3. Submit the Form

- Click “Sign Up”
- If your registration was successful, you will be taken to the OTP Verification page.

4. Enter the OTP and verify

- Enter the OTP sent to your student email in the six available slots
- Click “Verify”
- Once successfully verified you will be taken to the “Proof of Registration Upload” page where you must upload your proof of registration.

5. Submit Proof of registration

- After being successfully verified against your email, you still need to be verified against your degree and year of study, hence upload your proof of registration and your account will go under review.
- After that an admin will review your verification then and choose to either approve your account, request for resubmission or reject your account.
- Information as to why we require you to submit your proof of registration.

 Why do we need this?

We require your official proof of registration to confirm the current degree you are studying, this is needed for the system to be able to recommend listings based on your degree. If you don't upload your proof of registration you will not have access to the system as this is needed as part of the verification process. Once you upload your proof of registration your account will be under-review and you will be allowed partial access to the system.

5.2 Logging into the System

Once your account is created and verified you will be taken to the login page to login into the system:

1. Enter your Credentials.
 - Email: enter your registered student email address
 - Password: Enter your password (use the eye icon to check for any typing errors)
2. Submit Login
 - Click the “Login” button.
 - After a successful login you will be taken to your buyer’s dashboard
3. Forgot Password
 - If a user has forgotten their password, they can then reset their password by clicking the [forgot password button](#)

WELCOME BACK!
Enter your credentials to access your account.

RESET PASSWORD

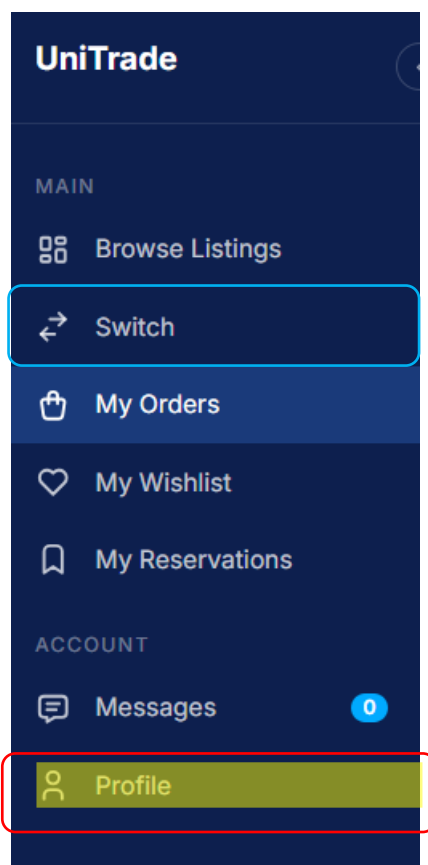

5.3 Profile Management

Accessing your profile

Once logged in, you can access your profile/account setting by using the profile tab on the side bar. You can access this tab from both the seller's side or the buyer's side.

1. Navigate to Profile

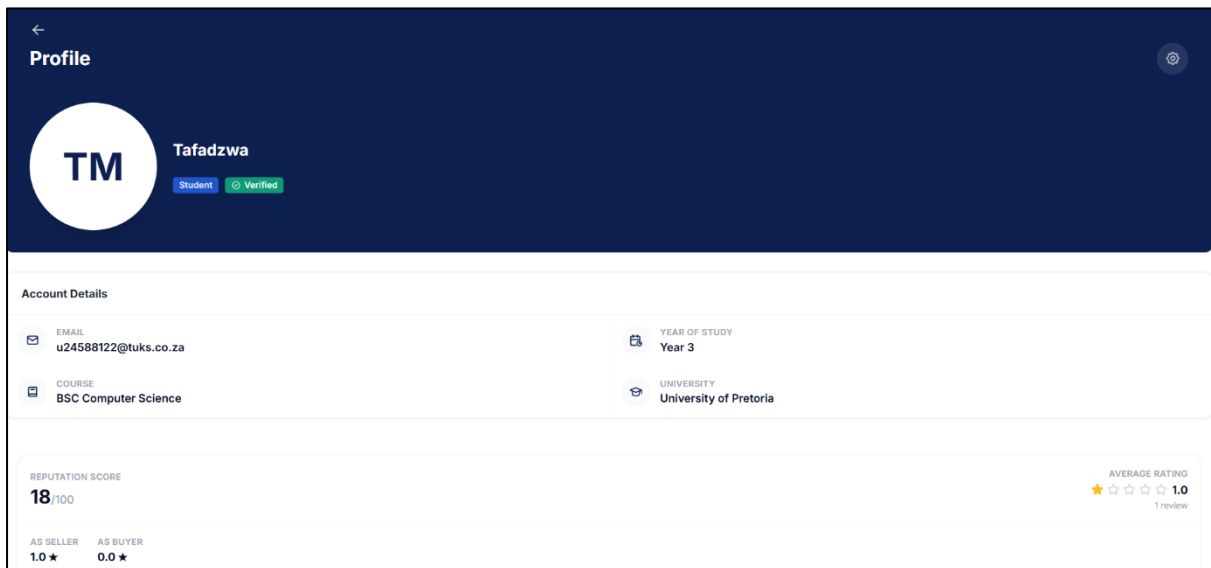

- Click "Profile" on the side bar to access your profile page.
- Click Switch to move to the seller side of things, so if you ever want to sell your second-hand items use the switch tab on the Side bar to go to the seller side.

2. Profile Overview The details available on your profile page:

- Your full name
- Your role (either student or admin)
- Account details
 - Your student email address
 - Year of study
 - Your Course
 - University
- Reputation score (out of 100)
- Average Rating

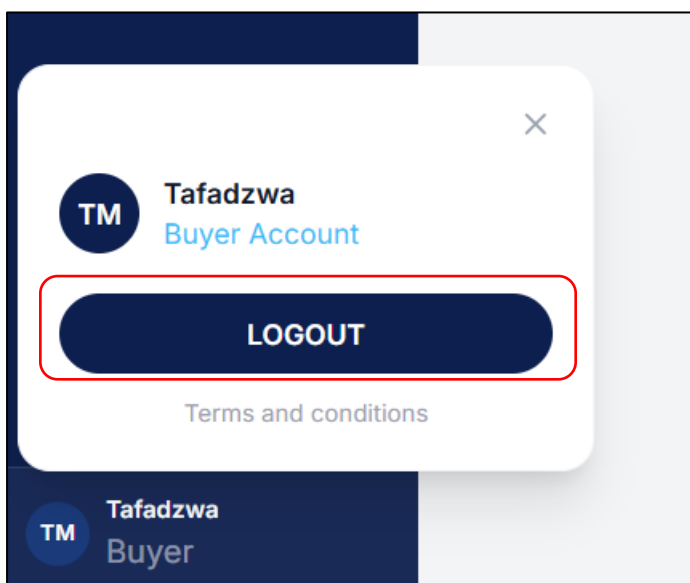

- Your reviews

5.4 Logging Out

When you are done using the system you can safely logout:

1. Use the logout button from the profile page:
 - Click “Logout” to successfully end your session.
2. Use the logout button from the navbar:
 - Click on your account information at the bottom of the navbar.
 - Click “Logout” on the pop up that appears to end your session.

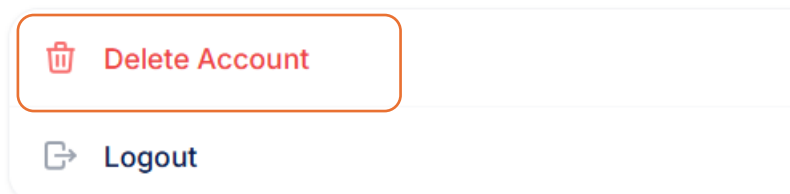

5.5 Deleting Your Account

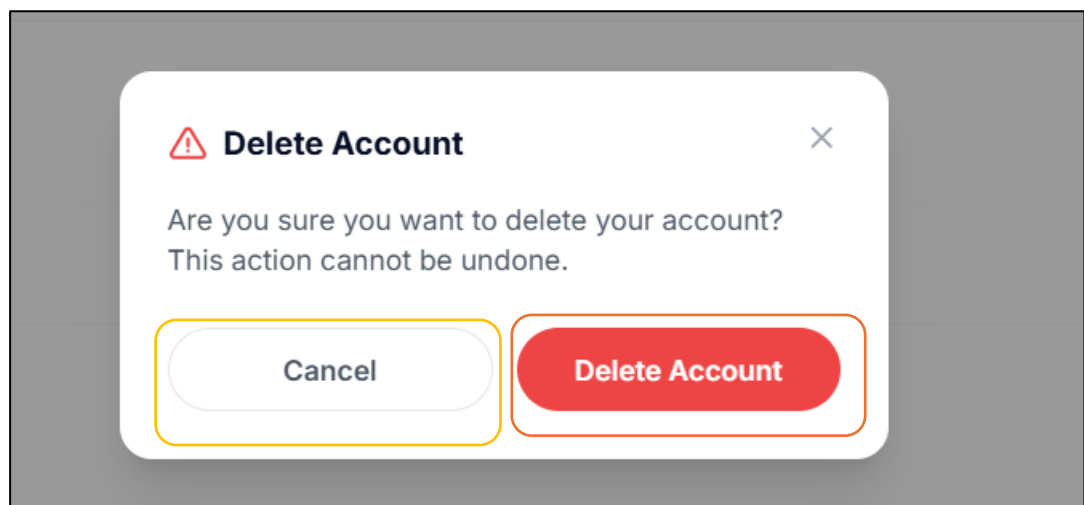

You can delete your Unitrade account anytime and will be required to sign up from the beginning the next time you want to use the system.

1. Use the delete button from the profile page:

- Click “Delete Account” on the profile page to successfully delete your account.
- Once your account is deleted you must go through the whole registration process again when you want to use the system again.

- If you change your mind about deleting your account, you can Press cancel, and your account will not be deleted.

6. Dashboards

6.1 Buyer's Side

The dashboard is where you can browse all listings, reserve and add to wish list.

1. Browse all listings.

This page displays all active listings available on UniTrade, giving you a place to explore what other students are selling. Listings are shown as cards with a preview image, title, price and category, this helps you to quickly scan through the options.

- **Filter By category**
 - Narrow down listings to a specific category (e.g. Textbooks, Electronics, Furniture, Clothing) so you only see items relevant to what you are looking for.
- **Filter by Condition**
 - Refine your search results based on each of the item's condition (e.g. Like New, Fair, Good, Worn) so you can quickly find listings that match your quality expectations.
- **Sort**
 - Reorder the listings bases on your preference, such as Newest First, Price: Low to High or Price: High to Low, making it easier for you to find the best deals or the most recently listed items.

2. View listing's details

- Clicking on any listing card takes you to its full details page, where you can see everything, you need to decide whether to make a reservation. This includes:
 - Full image gallery – Browse through all photos the seller has uploaded, not just the preview image.
 - Price – The listed price for the item.
 - Seller Information – Details about who is selling the item, so you know who you are dealing with.

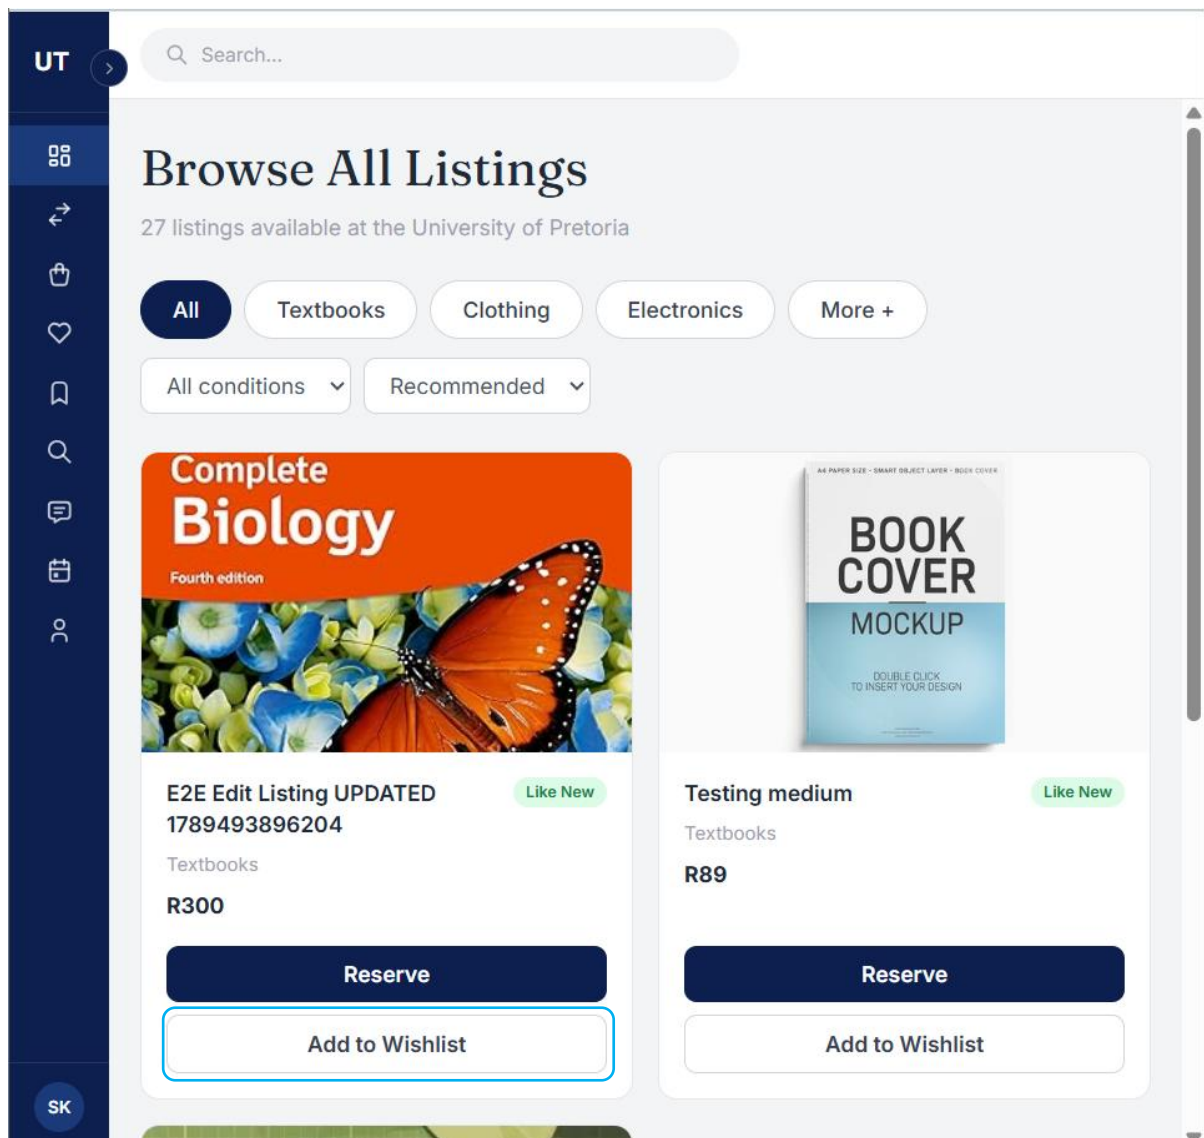

- Item description – A detailed write-up from the seller covering condition, specifications, and any other relevant information.
- More Listings details about, do help you when you are deciding about whether you would like to reserve it or not, the details are category, condition, course code (if it is a textbook), the date it was listed on.
- Similar listings so you can see other options, with possibly different price.

3. Add To Wish List

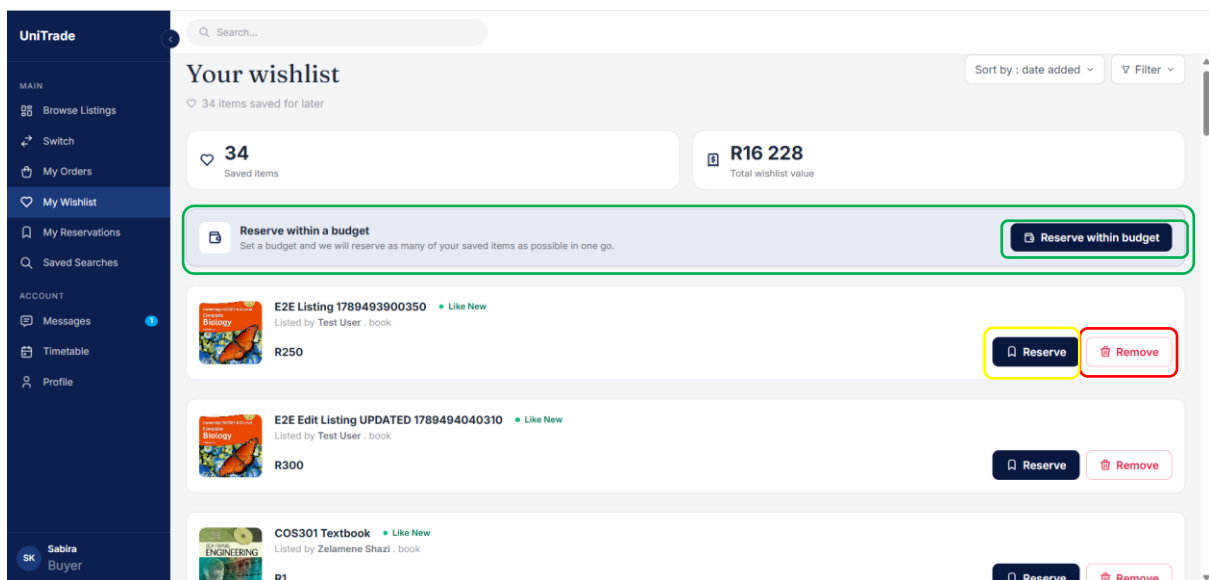

- If you find an item you're interested in but aren't ready to reserve it yet, you can add it to your Wish List by clicking on the "Add to Wishlist" button on the browse all listings page. This lets you:
 - Save listings you want to revisit later without losing track on them.
 - Keep a personalized collection of items you are considering.
 - Quickly access saved items from your Wishlist page instead of searching for them again.

- After adding to your Wishlist it should show that the Listing is in the Wishlist “In Wishlist”

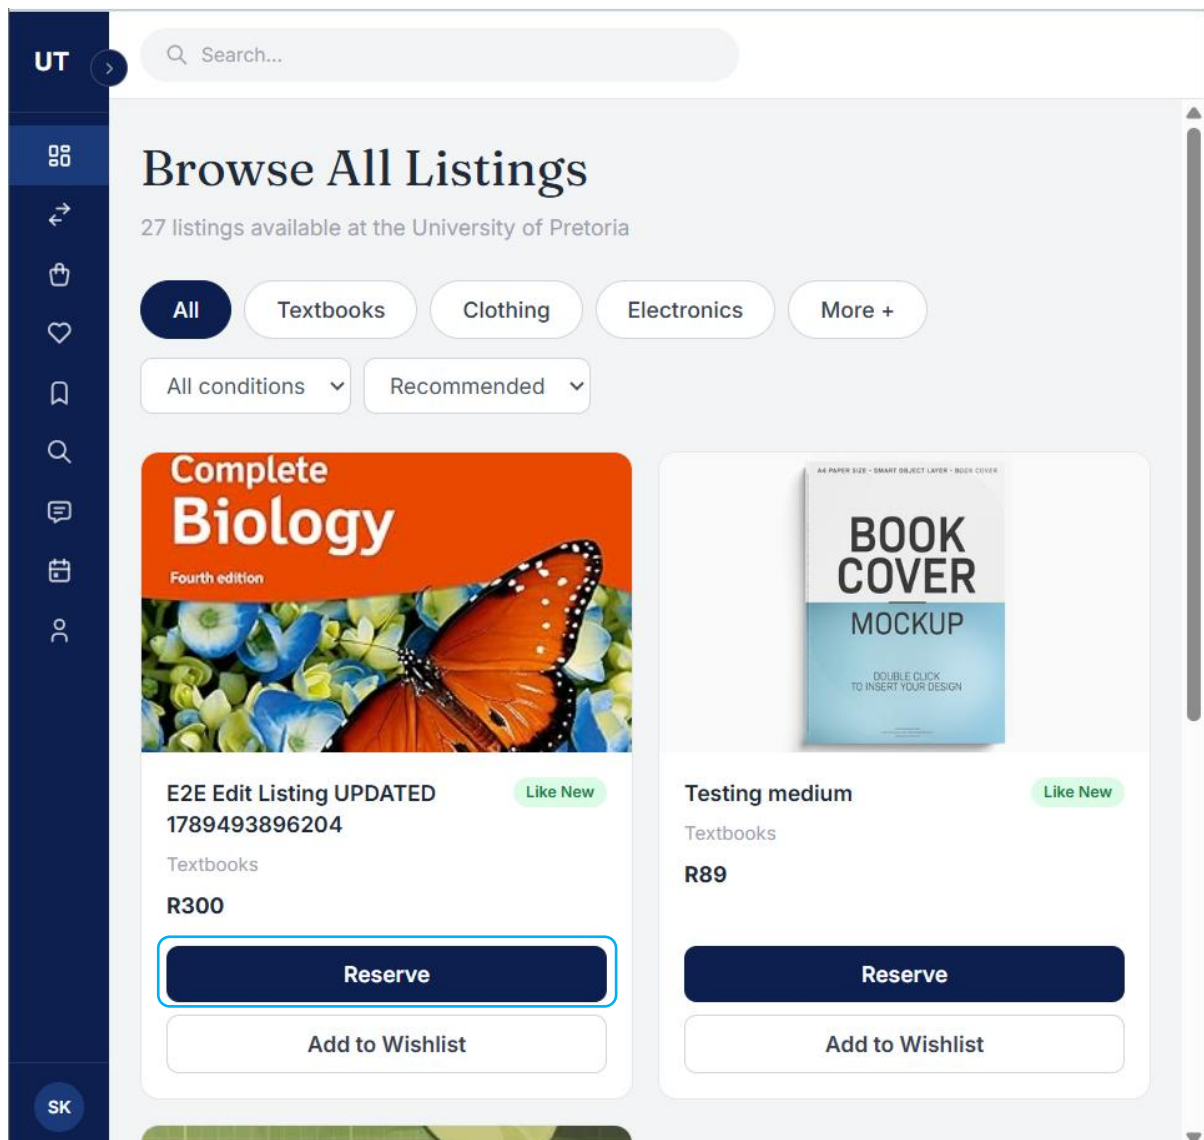

The screenshot displays the 'Browse All Listings' interface. On the left is a dark blue sidebar with the 'UT' logo and a vertical menu of icons. The main content area has a search bar at the top with the text 'UPDATED'. Below the search bar is the title 'Browse All Listings' and a subtitle '3 listings available at the University of Pretoria'. A category filter bar includes 'All' (selected), 'Textbooks', 'Clothing', 'Electronics', and 'More +'. Below this are dropdown menus for 'All conditions' and 'Recommended'. Two product cards are shown, each for 'Complete Biology' (Fourth edition) with a butterfly image. Each card lists 'E2E Edit Listing UPDATED' with a unique ID, 'Textbooks' category, and 'R300' price. The first card has 'Reserve' and 'Add to Wishlist' buttons. The second card has 'Reserve' and 'In Wishlist' buttons, with the latter highlighted by a green border.

- Your Wishlist page
 - If you no longer want an item saved, you can remove it from your Wishlist by clicking the remove button on the Wishlist page. This helps in keeping Wishlist up to date and only showing items, you're genuinely interested in.
 - If you are interested in buying the item, you can reserve directly from the Wishlist page by clicking the "Reserve" button.
 - If you have a specific budget and you want help selecting the items to buy, you can use the Reserve within a budget functionality, just click "Reserve within budget" then select the items you want even though they don't fit within your budget then automatically the system will reserve some of the items for you (the ones that fit within your budget) and you will be informed of the items that were actually reserved and the ones that didn't fit within your budget.

4. Reserve

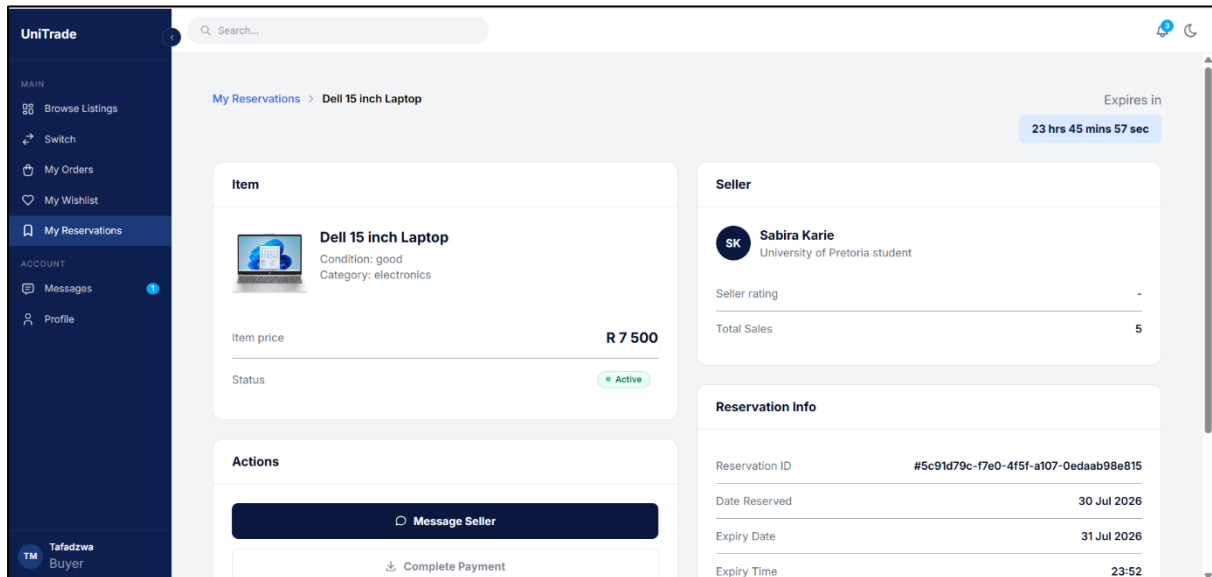

- Once you have decided on an item, you can reserve it directly from the listing's page by clicking the **Reserve** button. This action:
 - Notifies the seller that you are interested in their listing.
 - Prevents the item from being reserved by other buyers while your reservation is still active.
 - Creates a reservation record you can track from your Reservations page.

- After reserving your item will be held for you for 24 hours until you or the seller schedules a meeting, when the meeting is scheduled, the timer will be stopped, but if the timer expires the listing will be put up for sale again, so ensure you schedule the meeting within the 24 hours.
 - Message Seller
 - Directly from your reservation, you can open a chat with the seller to ask questions, confirm details, or arrange a meetup time and location. This keeps all communication tied to a specific reservation, so there is no confusion about which item you are discussing.
 - Cancel Reservation
 - If you change your mind or can no longer go through with the purchase, you cancel the reservation by clicking the “Cancel” button on the reservation card.

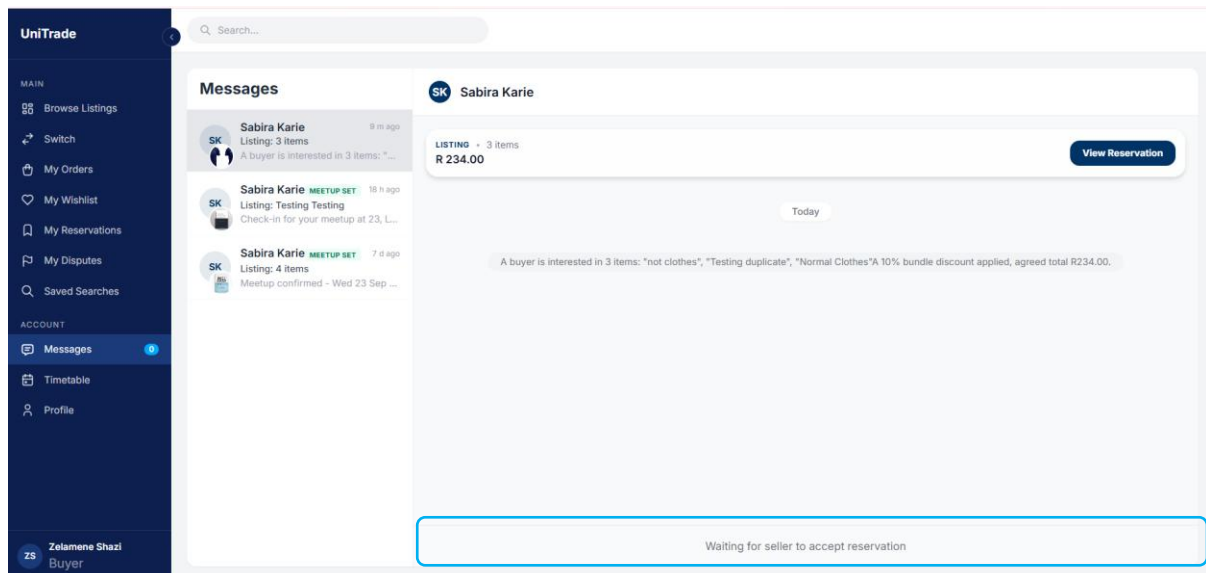

The screenshot displays the 'My Reservations' section of the UniTrade application. At the top, there are summary statistics: 5 Active reservations, 1 Expiring soon, and a Total reserved value of R1387. Below this, a list of reservations is shown. The first reservation is for an 'E2E Test Textbook' listed by 'Test User' for R250. It is in an 'Active' state and has a timer showing '23 hrs 59 mins 47 sec' remaining. The buttons 'View Reservation', 'Message seller', and 'Cancel' are visible. The 'Cancel' button is highlighted with a red box, and the 'Message seller' button is highlighted with a green box. The second reservation is for a 'COS301 Textbook' listed by 'Zelamene Shazi' for R1, also in an 'Active' state with a similar timer. The third reservation is 'testing testing' listed by 'Zelamene Shazi' for R90, which is in a 'Completed' state. The left sidebar contains navigation links for 'MAIN' (Browse Listings, Switch, My Orders, My Wishlist) and 'ACCOUNT' (Messages, Timetable, Profile). The user's name 'Sabira Buyer' is at the bottom of the sidebar.

- View Reservations Details
 - From your reservations page, you can click into any active reservation to see its full details or the “View Reservation” button, including the item information, reservation status. This gives you a quick overview of where things stand without having to go back to the original listing.

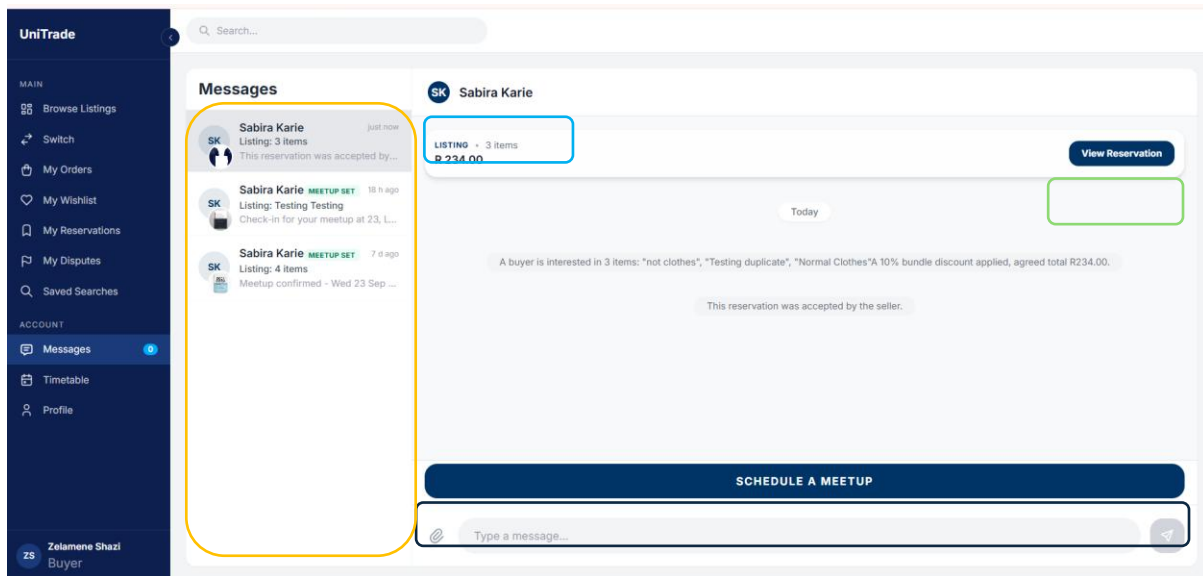

5. Chat Page

- You can only start chatting with the seller once they have accepted the reservation, to get to the chat page use the “Messages” tab on the sidebar or the “Message Seller” button.

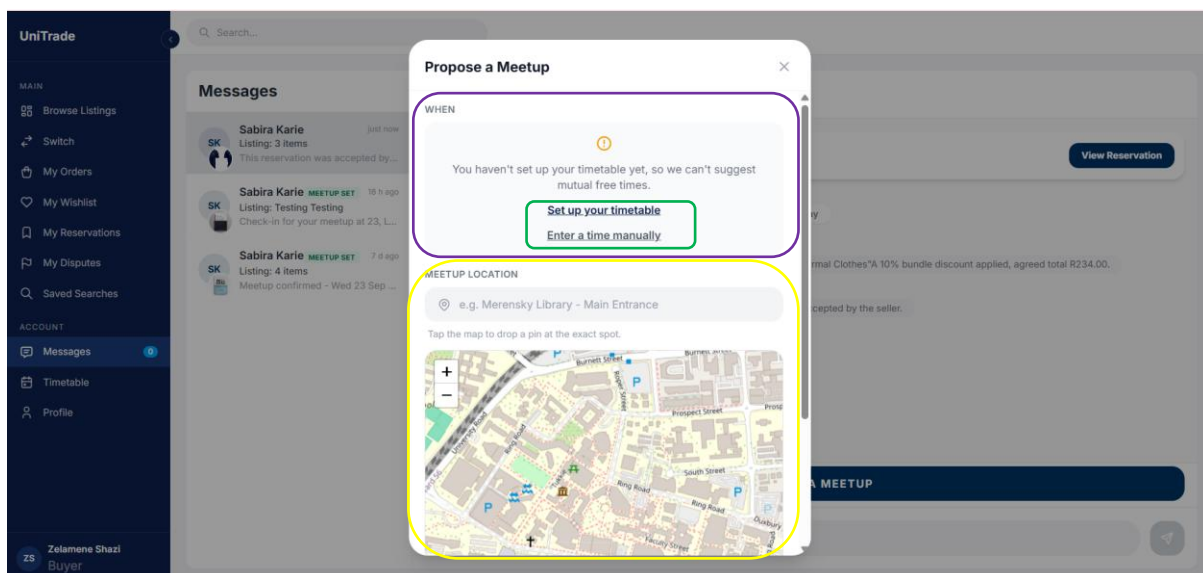

- The seller’s name and Initials.
- Use this button to view the reservation directly from the chat, instead of going back to the reservations page.
- Use the button to propose/schedule a meeting with the seller (this is particularly important and should be done).
- This is the chat sidebar where you see all the messages you received, this is also for quick access of the other chats.

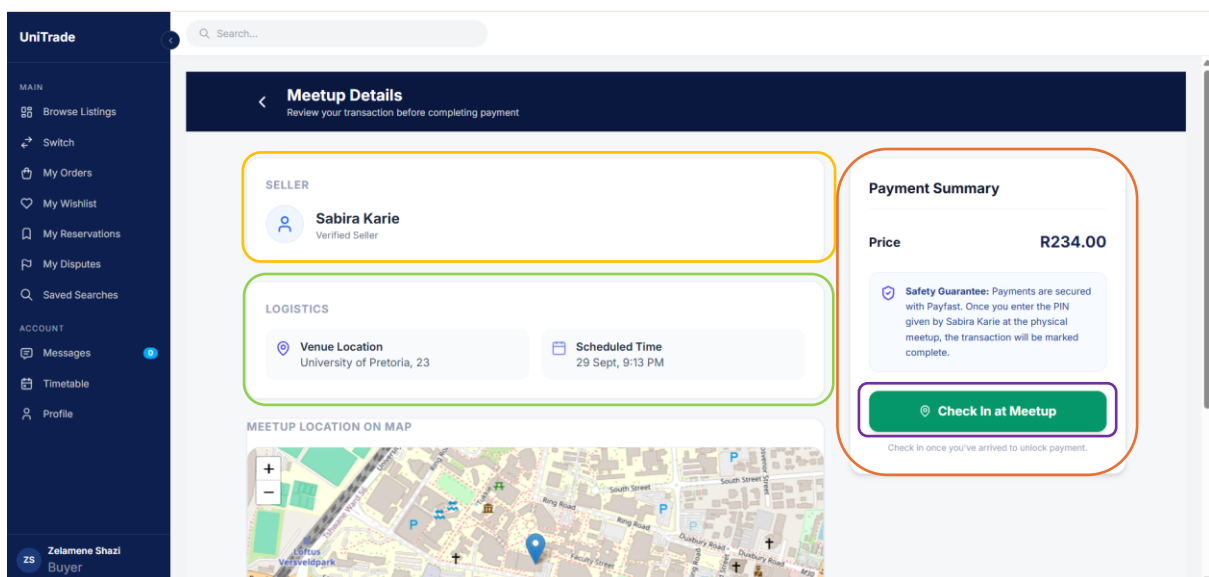

6. Meetup Scheduling

- When you know the time and place you would like to meetup the buyer for the exchange, click “Schedule A Meetup” on the chat page, you will see a Propose a Meetup.
- Pick the Meetup location you would like to meetup with the buyer or just pin the location on the map and the location will be updated automatically.
- To pick the time either set up your timetable showing the times you are free, so the times can be loaded automatically for you, or enter the time manually.

7. View Meetup Details

- Seller details, showing that they are verified hence allowed to use the system.
- Logistics, showing the venue location, scheduled date and time.
- Payment summary, showing the price of the product, safety guarantee and a check in button, the check in button is what you use when you get to the agreed location, if you don't check in upon arrival you won't be allowed to pay, because the payment button is only shown once you've checked in.
- Once you arrive at the agreed location allow the browser access to your location and you will be allowed to check in, once checked in, you will be allowed to pay.

8. Payment

- Press “Pay” and you will be redirected to Pay Fast to process your payment.

Payment Summary

Price**R190.00**

 **Safety Guarantee:** Your funds are held securely by UniTrade. The sale completes once you enter the PIN shown by Seller at the physical meetup.

 **Pay R190.00**

By paying you agree to the UniTrade Payment policies.

- Press Complete Payment, to complete the payment.
- Use the cancel transaction if you cannot pay or change your mind.
- The payment summary that shows you the total amount you must pay.

[Back to](#)

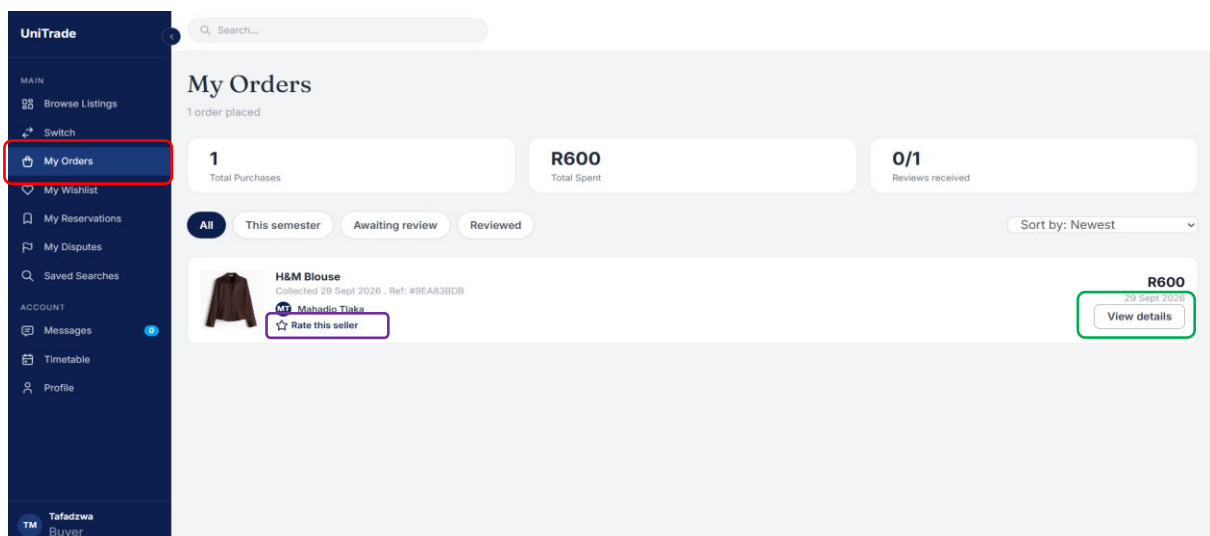

9. After Payment

- After completing the payment, you must receive and enter the PIN that the seller gives you. This PIN is used as the final confirmation of the transaction, if you don't enter the PIN the transaction will never be marked as complete, so the PIN confirmation is important.

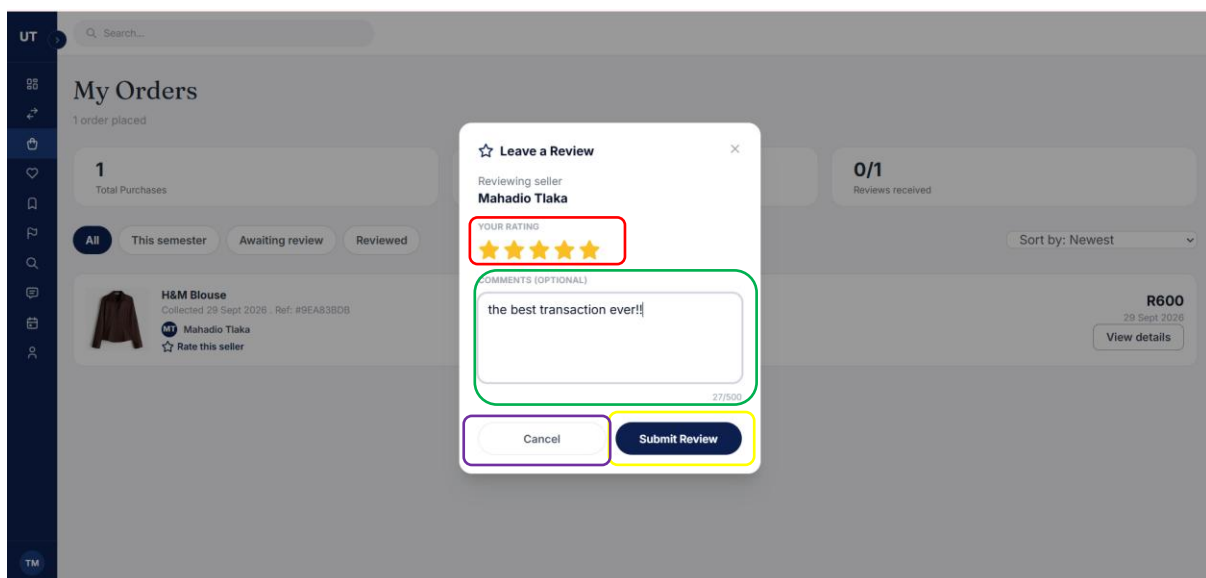

10. My Orders

- After a successful transaction that order and all your prior orders should appear on “My Orders” page, click on the “My Orders” tab on the side bar to navigate to the “My Orders” Page.
- From “My Orders” you can view specific details of the order, including a timeline.
- From “My Orders” you can rate the seller; this rating should reflect what you felt about the transaction.

11. Rating and Reviewing

- After a successful transaction, as a buyer you are allowed to review the seller, this should reflect exactly what you felt about that specific transaction.
- Click “Rate this seller”
- Specify the stars you want to give the seller.
- Specify a comment as well, this is very important for the seller to know what they need to improve on.
- Click “Submit Review” to submit the review.
- Click “Cancel” to cancel the review.

6.2 Seller's Side

1. My Listings Page

- Click New Listing to upload a new listing.
- Filter by Status.
- Click view to view the listings details, this is where you get more details on your listing.
- If you don't want to sell your product anymore, you are allowed to delete the listing, only when it is in the live, draft stage, once your listing has been reserved you are blocked from deleting it, because that will not be fair to the buyer.
- If you want to change some details about the listing, e.g. the price, condition or description, click the edit button and you will be taken to the Edit Listing page.
- For your listings to sell really fast, you can set a discount on bundle reservations, so buyers are allowed to make bundle reservations, click on the setup button to set up your desirable discount for a certain number of listings (this is again your choice), and the discount will be applied when a buyer has a bundle reservation with more than 3 listings.
- When you upload a listing and it goes under review because some of the details provided don't match the claims e.g. you pick the category textbook and you upload jeans, it will be flagged. Click "View details for reasons" to see the specific reasons why you were flagged.
- If unfortunately, your listing was banned, because you were found guilty of the things you were flagged on. Click "View details for reasons" to see the actual reasons why you were banned. When you are banned, you cannot resubmit you're listing.

UNITRADE

2. Upload Listing

- Follow these steps to successfully upload a new listing.
 - Choose the correct category of your listing, this is mandatory and should be done honestly because it will be used for recommending products to buyers.
 - Write a Title for your product, if your product is a textbook, you can print the name of that textbook.
 - Write a detailed description of the listing, e.g. what edition of the textbook is it, or what brand of laptop it is.
 - Upload the images of your listing, do not use images from the internet as that is not your own images, if it is caught that you used internet images, you may be flagged or even banned from using the system. Consider uploading at least 2 images.

The screenshot shows the 'Create New Listing' interface on the UniTrade platform. The left sidebar contains navigation links: MAIN (My Listings, Switch, New Listing, My Sales, Reserved), ACCOUNT (Messages, Timetable, Profile), and a user profile for 'Zelamene Seller'. The main content area is titled 'Create New Listing' and includes a search bar. It is divided into two steps: 'Step 1: Basic Information' and 'Step 2: Pictures'. Step 1 includes a 'Listing Information' section with a 'Category' dropdown (Textbooks, Clothing, Electronics, Furniture, Stationery, Other), a 'Title' field, a 'Module (e.g. COS110)' field, and a 'Description' field. Step 2 includes an 'Images (Drag & Drop or Upload)' section with four upload slots and a note 'Up to 4 photos, max 10MB each'.

- Specify the price of your listing.
- Pick the condition of your product, it is very important that you are honest about this part because it can be misleading to the buyer if you lie about the condition of your product.
- Select the quantity of your listings, you can list more than 1 listing but less than 10 listings at the same time. The Listings will appear independently on the buyer's side.
- After entering all the required details, you will get confirmation with a summary view of your listing, if this is not correct to what you had in mind, please check the details you entered and correct and wrong information.
- After confirming that everything is correct, and you are ready to submit listing click Submit Listing and the listing will go live.
- If you are not ready for your listing to go live, you can save the listing as draft and you can always submit it when you are ready.

The screenshot displays the UniTrade mobile application interface for creating a new listing. The left sidebar contains navigation options: MAIN (My Listings, Switch, New Listing, My Sales, Reserved), ACCOUNT (Messages, Timetable, Profile), and the user profile (Zelamene Seller). The main content area shows a progress bar with two steps: Step 3: Price (active) and Step 4: Confirmation. Step 3 includes fields for Price (ZAR), Condition (Like New, Good, Fair, Worn), and Quantity. Step 4 shows a Summary Overview with the listing title 'Untitled Listing' and details 'Book - RO - Like New'. At the bottom, there are buttons for 'Save Draft' and 'Submit Listing'.

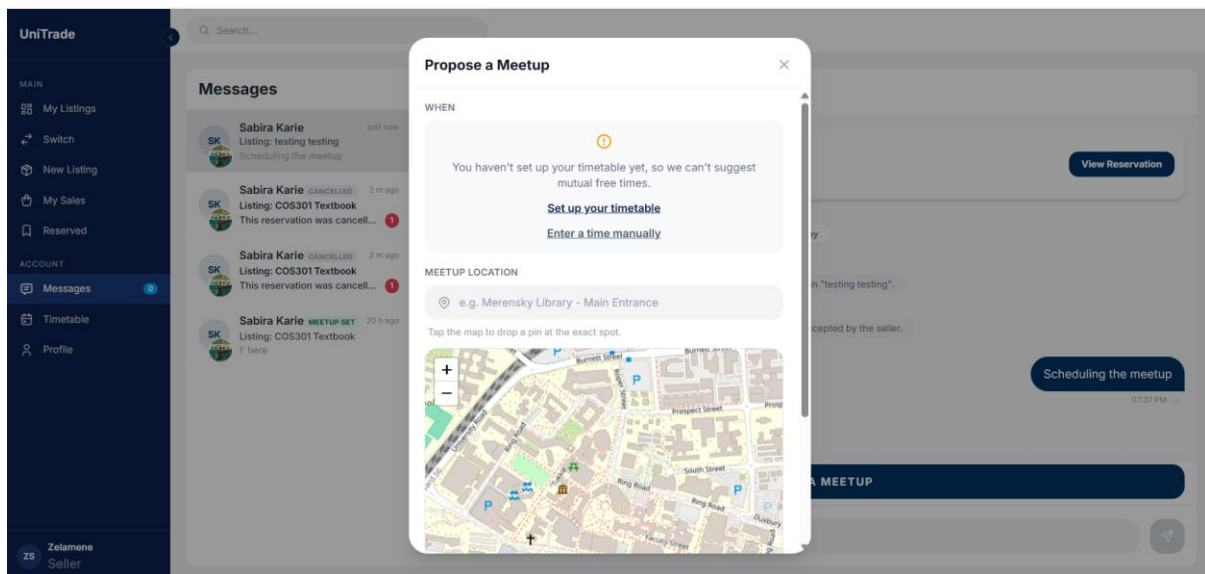

3. Reservation

- After the buyer reserves your product, it will appear in you “My Reserved” page, and you are supposed to accept the buyer’s reservation within 24 hours to ensure that the reservation does not expire.
- If the buyer is silent after 12 hours of reserving your product you as the seller has the right to cancel that reservation, hence you can’t cancel the reservation before the 12-hour mark.
- To chat with the buyer, click “Message buyer”, and coordinate a meetup place with them, either you or the buyer has to schedule the meeting.
- You are also allowed to reject the buyer’s reservation if you have other plans for your listing.

The screenshot displays the UniTrade interface for a seller named 'Zelamane Seller'. The main section is titled 'My Reserved Items'. At the top, there are three summary boxes: '2 Active reservations', '1 Action required', and 'R91 Pending reserved value'. Below these, a list of reservations is shown. The first reservation is for 'testing testing' (labeled 'Active') reserved by 'Sabira Karie' for 'R90'. It is in a 'Waiting on seller' state and has an 'ACTION TIMER' of '23 hrs 58 mins 46 sec'. Action buttons include 'Accept Reservation' (green), 'Message buyer' (blue), and 'Reject' (yellow). The subsequent two reservations are for 'COS301 Textbook' (labeled 'Cancelled') reserved by 'Sabira Karie' for 'R5 000 000' and 'R1' respectively. The final reservation is for 'COS301 Textbook' (labeled 'Completed'). The left sidebar contains navigation links for 'My Listings', 'Switch', 'New Listing', 'My Sales', 'Reserved', 'Messages', 'Timetable', and 'Profile'.

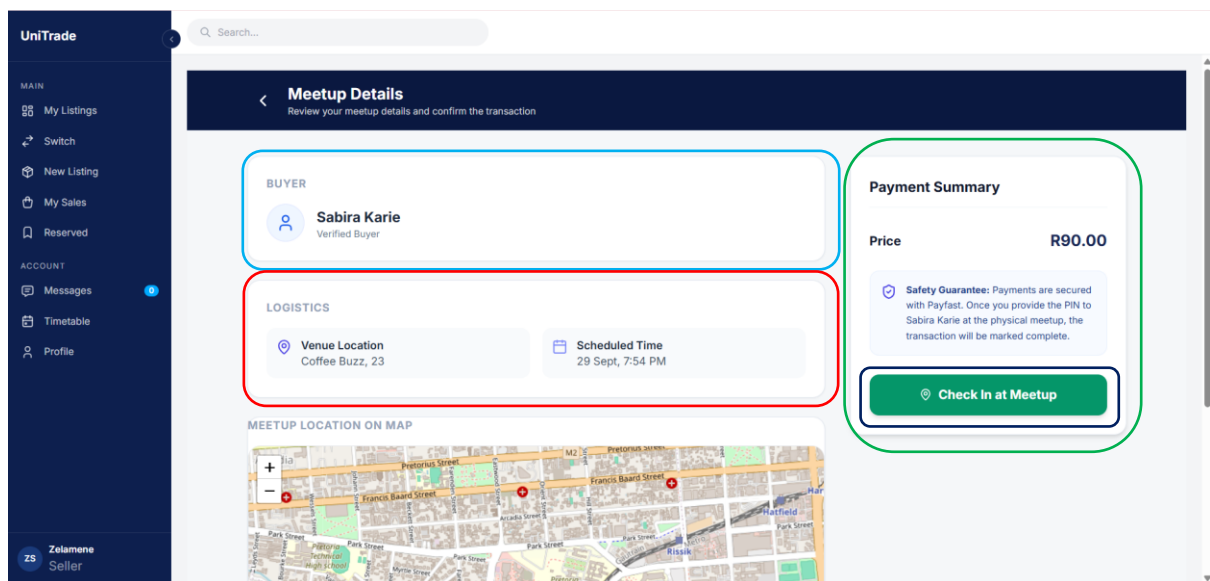

4. Meetup Scheduling

- When you know the time and place you would like to meetup the buyer for the exchange, click “Schedule A Meetup” on the chat page, you will see a Propose a Meetup.
- Pick the Meetup location you would like to meetup with the buyer or just pin the location on the map and the location will be updated automatically.
- To pick the time either set up your timetable showing the times you are free, so the times can be loaded automatically for you, or enter the time manually.

5. The Meetup Details

- The buyer's details so you know the name of the person you are dealing with.
- The logistics of the meet up i.e. the venue location, the scheduled time.
- The payment summary showing the price that the buyer must pay, and a safety guarantee.
- Once you arrive at the meetup click on the “Check in at Meetup” to check in, this should be done, so you can get the PIN for confirmation and give it to the buyer.

6. Payment

- After the buyer completes their payment, and you have received the funds, you will have a generate PIN button, you should give the buyer this pin so they can enter it on their side, this is the final step of the payment.

Payment Summary

Price**R90.00**

 **Safety Guarantee:** Payments are secured with Payfast. Once you provide the PIN to Sabira Karie at the physical meetup, the transaction will be marked complete.

 **Show PIN to Buyer**

Transaction PIN

Show this PIN to the buyer. They enter it to complete the sale.

7. My Sales

- After a successfully transaction, you My Sales page should be updated showing the new sale, navigate to “My Sales” page using the “My Sales” tab on the sidebar.
- Use the “View Details” to view the specific details of that sale including the timeline.
- Click on “Rate this buyer” to rate the buyer based on how you felt about that specific transaction.

8. Rating and Review

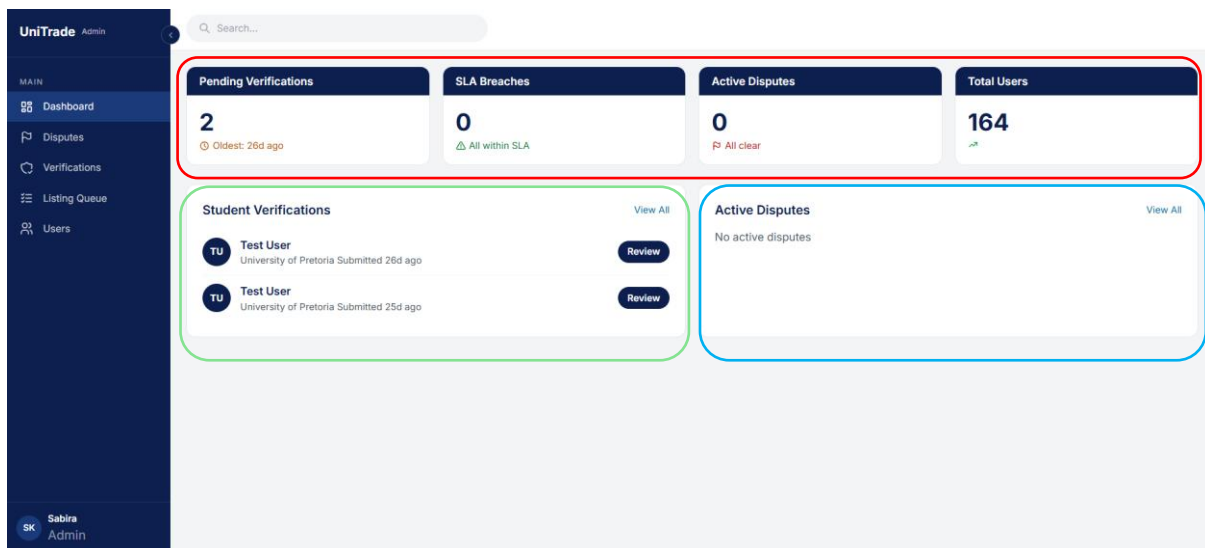

- Specify the stars you want to give the buyer.
- Add a comment, this is to just inform the buyer what they can change on their next transaction.
- Click “Submit review” to submit the review.
- Click “Cancel” to cancel the review.

6.3 Admin's side

1. Admin Dashboard

- View all the pending verifications, SLA Breaches, Active Disputes and the Total Users In the system.
- View all the pending Student Verifications on the dashboard.
- Click view to view all the Active disputes on the dashboard.

2. Active disputes

- As an admin you can view all the active disputes from both the sellers and buyers in the system.
- Can view all the active and closed disputes.
- The disputes type is also specified to avoid any confusions, the types are “No show” (when one or both parties did not show up to their meetup), “Listing Quality” (when the buyer is not happy or satisfied with the listing or product they received) and “Report Listing” (buyers are also allowed to report listings that they think are going against the app policy).
- Click “Review” to see the details of a specific dispute and make an informed decision based on the available evidence.
- Statistics are also provided showing how many of the disputes are available i.e. the total available disputes, the no show disputes, the Listing quality disputes and the report listing disputes.

3. Student verifications

- As an admin you can view all the different types of verifications such as the overdue, due soon and the normal verifications.
- As an admin you can perform different actions such as to decide to ask for a review of the student's proof of registration and view the document of the student's proof of registration.
- As an admin you can sort the student verifications from oldest to first.
- As an admin you can view how long they have left to view the verification for a student's proof of registration to ensure that it is approved in time so students can have full access to the system.
- As admin you can download the proof of registration of the student, view it and see and decide if it is valid.

The screenshot displays the 'Student Verifications' page in the UniTrade Admin system. The interface includes a sidebar with navigation options: Dashboard, Disputes, Verifications (selected), Listing Queue, and Users. The main content area features a summary section with four cards: '85 Overdue', '0 Due Soon', '85 Total Pending', and '0 Approved Today'. Below this, there are filters for 'All', 'Overdue', 'Due soon', and 'Normal', along with a 'Sort: Oldest First' dropdown. The table below lists student verifications with columns for Student, Verification Status, Document, and Actions.

STUDENT	VERIFICATION STATUS	DOCUMENT	ACTIONS
TU Test User .Y2	Overdue 57th overdue - Valid SA Uni domain	Proof of registration Uploaded 2026/09/03	Review View Doc

4. Flagged Listings

- When a seller uploads a listing that is not acceptable, e.g. they upload jeans when they chose the category textbook, their listing will be flagged, and as admin you can see that listing on the Listing Queue and make a decision based on the available evidence.
- When a listing is flagged a risk score is calculated, that is one of the shown values, because this can help you as an admin to make informed decisions.
- Can sort the flagged listings from oldest to first.
- Use the review button to view a specific listing with its specific details.
- Based on the category picked by the seller and the image they uploaded, an image match score is calculated, and this can also be used as a guide to decide.
- Because the seller can be flagged based on different reasons, the reasons why they were flagged are also specified on the Listings Queue page.

The screenshot shows the UniTrade Admin interface. The left sidebar contains navigation links: Dashboard, Disputes, Verifications, Listing Queue (selected), and Users. The main content area is titled 'Flagged Listings' and includes a search bar and a summary of flagged items: 2 Awaiting Review, 1 Price Anomalies, 0 Duplicate Images, and 1 Low Image Match. Below this is a table of flagged listings with columns: LISTING, RISK, WHY IT WAS FLAGGED, IMAGE MATCH, and ACTIONS. Two listings are shown: 'COS 122' (R 900 000,00 - Flagged 21 Sept 2026 (7d ago)) and 'COS 301 Textbook' (R 3,00 - Flagged 21 Sept 2026 (7d ago)). The 'COS 301 Textbook' listing is highlighted with a red border. Its 'RISK' column shows 'High risk' with a score of 70/100. Its 'WHY IT WAS FLAGGED' column lists 'Seller strikes' and 'Category mismatch'. Its 'IMAGE MATCH' column shows 'Image match 10%'. Both listings have a 'Review' button in the 'ACTIONS' column.

LISTING	RISK	WHY IT WAS FLAGGED	IMAGE MATCH	ACTIONS
COS 122 R 900 000,00 - Flagged 21 Sept 2026 (7d ago)	High risk Score 70/100	Seller strikes Price anomaly	Image check not run	Review
COS 301 Textbook x10 copies R 3,00 - Flagged 21 Sept 2026 (7d ago)	High risk Score 70/100	Seller strikes Category mismatch	Image match 10%	Review

12. Users

- As an admin you can view all the different users in the system such as the total number of users in the system, which of those users that are verified and those who are pending verification.
- Can view all users who have strikes, who are verified and those who are pending verification.
- Can view the reputation score of each user.
- Can view how many strikes each user has.
- Can view, by the actions button the profile of each user whereby you can see what they are studying, the year that they are in and the university that they attend.
- Can view the verification status of the user.
